

I have 6 years of experience building high-performance, user-friendly interfaces with HTML, CSS, JavaScript, Vue, Nuxt, and React. I've contributed to both business products and personal projects — including mobile apps and games — always focused on creating simple, impactful, and reliable solutions.

Experience

Dedecta

Vue, Nuxt Developer

Oct 2024 - March 2025

At Dedecta, I contributed to a scalable social media monitoring dashboard as a Vue.js frontend developer. I implemented reusable component structures, optimized app performance, and managed complex state flows with Pinia. My focus on modular architecture and clean code helped ensure long-term maintainability. Working in Agile sprints, I consistently delivered reliable and user-centric solutions.

Skolbord

Front-End - Back-End Developer (half time)

July 2021 - Present

At Skolbord, I worked across frontend and backend development. On the frontend, I used Vue.js, JavaScript, and Tailwind to improve performance, reducing page load times by up to 10x. I built and published mobile apps with Capacitor. On the backend, I developed scalable APIs and admin panel features using Node.js and Nest.js. I also leveraged tools like Jira, Figma, GitLab, and Postman to streamline development and collaboration.

Luova Mainos

Software Developer

Helsinki, Finland

Aug 2021 - Jan 2022

At Luova Mainos, I developed a multi-tenant frontend application for Finnish restaurants using Vue.js. I implemented key features including interactive mapping, basket management, payment integration, dynamic listing and filtering, and multi-language support. Collaborating closely with stakeholders, I ensured efficient delivery and aligned the product with business requirements.

Education

Gebze Technical University

Geomatics engineering

Kocaeli, Gebze, Türkiye

2020-2024

Grade: It helped me gain an engineering perspective and approach situations from an engineering perspective.

Skills&Interests

- **Languages:** JavaScript, TypeScript, PHP, Python, Bash/Shell
- **Front-end:** VueJS, Vite, NuxtJS, Svelte, React, HTML5, CSS3, Babel, Webpack, JQuery
